## 1. PURPOSE

This document describes the Chain of Custody (CoC) Certification Policy, according to the FSC® and PEFC schemes, implemented by INDUSTRIE CELTEX SPA.

## 2. SCOPE OF APPLICATION

It applies to all processes and all products at INDUSTRIE CELTEX SPA.

## 3. MISSION

The Mission of INDUSTRIE CELTEX SPA is to guarantee the highest quality of products and to provide a service capable of meeting the growing demands of the market, including environmental issues.

CoC FSC® and PEFC certifications certify the origin of pulp paper obtained from the processing of timber from sustainably managed forests, to be understood as compliance with forest management regulations that guarantee the management and use of forests in a way that preserves their biodiversity, productivity and renewability. Sharing the principle of safeguarding the forest heritage and guaranteeing to its customers that the paper sold does not come from forests disfigured by unscrupulous felling, motivated by the desire to transmit this guarantee to the customer through a certificate and a dedicated distinctive logo, INDUSTRIE CELTEX SPA has set up a traceability system for FSC® and PEFC certified products in compliance with the requirements defined by the respective certification schemes, in order to guarantee the achievement of the following objectives:

- definition of guidelines to ensure and guarantee that the C.o.C. complies with the requirements of the FSC® and PEFC standards;
- promoting the spread of certification in order to contribute to the consolidation of Sustainable Forest Management and compliance with existing forest legislation;
- raising awareness of Sustainable Forest Management issues among its staff, customers and suppliers;
- progressively increasing the sourcing of raw material from sustainably managed forests, and in any case verifying that these products do not come from illegal or otherwise unauthorised use;
- progressive increase in the production of FSC® and PEFC certified paper;
- promotion of new outlets for the use and marketing of FSC® and PEFC certified products.

INDUSTRIE CELTEX SPA undertakes to respect the FSC® values contained in FSC-POL-01-004, and therefore declares that it is not directly or indirectly involved in the following activities:

 <b>INDUSTRIE CELTEX</b>	<b>POLICY</b>	PO
	<b>FSC® - PEFC CHAIN OF CUSTODY POLICY</b>	Page 2/2
	Electronically stored copy, if printed not subject to update	Rev. 05

- the illegal deforestation or trade in illegal timber or forest products;
- the violation of traditional and human rights in forestry activities;
- the destruction of high conservation values in forestry activities;
- the significant conversion of forests into plantations or land for non-forest use;
- the introduction of genetically modified organisms in forestry activities;
- the violation of the principles of the ILO CORE CONVENTIONS as defined in the ILO Declaration of Fundamental Principles and Workers' Rights, 1998.

#### 4. TRACEABILITY SYSTEM OF INDUSTRIE CELTEX SPA

It is a precise company decision to establish, promote and disseminate a PEFC Traceability Control System aimed at achieving the above-mentioned objectives, assigning each company function the task of guaranteeing the traceability of the final product, controlling the correct and effective application of processes and the achievement of product/service objectives. The traceability method adopted by INDUSTRIE CELTEX SPA is called '*transfer*' (FSC®) and '*physical separation*' (PEFC) and consists of ensuring the permanent identification of FSC® and PEFC certified material at each step of the chain of custody. The Quality Policy is embodied in an annual plan of objectives, in which the management defines the priorities to be achieved during the year and the programmes to be implemented, and shares them with the management, which is responsible for disseminating them to all personnel.
